METAL FLOAT FRAMES

A single metal in the back of float frame is a metal print mounted flush to the float frame backing, creating a 2-dimensional effect with the float frame extending past the metal print. The metal print is touching the back edges of the float frame, but the frame does not overlap or cover any of the metal print.

A single metal float frame is a mounted flat metal print elevated out from the surface of the float frame backing, creating a "floating", 3-dimensional effect with a solid background. The single metal print is raised flush with the front edge of the float frame, but does not touch the edges of the frame.

A double metal float frame includes two metal prints of the same image, with the top metal being smaller and mounted on top of the back metal.

TRADITIONAL

A classically designed album with the look of matted pages with black or white spreads. A very simple and elegant design with no strokes or drop shadows. Text on the cover, but no text phrases or graphic embellishments used on the spreads.

MODERN

A blend of the traditional style with the addition of some colored accents and overlay effects customized to complement your images. Also designed with colored strokes and textured backgrounds to feature your images. Text on the cover, but no text phrases or graphic embellishments used on the spreads.

PLATINUM

Our most popular design style creates a beautiful storybook. Full pano image spreads give a dramatic feature to your album. Graphic embellishments, gradients, and text phrases are used to add personal touches to your album. Collage pages are another great feature in our Platinum design style.
